

## Suggested Apps to Load onto BYOD Devices for ADAPT & STRIVE

Below are some suggested apps that students may use at school. Your device may already have built-in apps that fit some of these categories. Families are encouraged to consider apps from each category. This list is designed to be general and to apply to most students. Your classroom teacher may suggest other apps in addition to those listed here. You may have other great apps you're using for the same purposes; if so, please let your teacher know!

<i>Reminders &amp; Lists</i>	<i>Photos &amp; Drawing</i>	<i>Health &amp; Fitness</i>	<i>Calendars</i>	<i>Shopping and Scanning</i>
Built-in Reminders app	Built-in Camera app	Walkathon + Fitness Games by Striiv	Built-in Calendar app	Built-in calculator app

Kindle	Evernote	Chrome	<b>*Android Device Manager (Android)</b>	RedLaser
Brytewave	Google Drive	Firefox		QR Reader
	Pages (iOS)			Dollar Up (iPad)

**\*Note: We would love for you to enable device location services in case a device is misplaced. For Apple devices you can set up the app Find iPhone and for Android the app is called Android Device Manager. Although we are not liable for lost devices, we will do our best to help students keep up with them.**
